From the mind of award-winning producer, musician and manager Jeremy "MisterHarding" Harding comes the *City Life Riddim*- the first in a series of forthcoming projects designed to put the "dance" back in dancehall and to re-establish reggae's place on the global music charts.

Produced in collaboration with Nigel "Sleepy Sply" Staff (current musical director for Jah Cure and renowned reggae producer, composer and session musician), the *City Life Riddim* brings the club-friendly reggae bassline back to the genre and bubbles with pop sensibility. Ten solid tracks feature some of Jamaica's finest artists, including Grammy-award winner Sean Paul, the "Energy God" Elephant Man, and rising female vocalist Denyque.
